Smart Contract Audit by 0xDit:

https://bscscan.com/address/0x796432d209b653ee6fcc18c630e2ae26887888a2

SUMMARY

This smart contract has been reviewed by 0xdit and found no backdoor door. There is no malicious code that allow owner to withdraw the funds but we saw one thing that the owner can become a big investor and withdraw the funds from the project because all the default referral rewards will go to the owner wallet. He/she can withdraw high ROI on daily bases.

This is the miner upgraded fork of Pizza Tower and based on BUSD.

REVISION ON SMART CONTRACT

- `function initialize()` || Once this button is clicked in the smart contract the project will be officially launch. This button can be only click by the Owner.

- `function addCrystals(address ref, uint256 value)` || This function is to deposit your BUSD into the smart contract along with the referral link. You cannot deposit into the project if you don't have the referral link. Here is the main story of rugs begin. Later investors cry in different groups that how the investor deposited a big amount of BUSD and the rug the contract.

You may come along with any youtuber referral that's good or with your friend referral.

Let me give you one example:

In a shorter word: let's say https://facebook.com?21528194218942194362579237913 52

Would you go with this URL to the Facebook or by simple https://facebook.com.

Of course, you will go with the simple one like that this type of project says that we have no fees but in the reality 90% of the investors traffic redirect to the website without any referral link.

As I have mentioned that you cannot invest without referral link. This type of project has by the backend of the website default referral link. Where straightforward all referral rewards go to the owner once these rewards goes to the owner he/she can upgrade towers, and daily claim high return on investments.

So, my suggestion to the owner is that do not come to me to excuse with this small code that in the contract the reward is not going to owner.

```
ref = towers[ref].timestamp == 0 ? manager : ref;
```

That you have changed this and deleted in AOEII.

If you want to gain trust of the community kindly add in the Add crystal section in the Frontend website one input field for referral that investor would know where their rewards are going.

In the fees wise it has no fees on buying Crystals which is good from them.

All the funds going to the smart contract once you deposit except Referral rewards.

```
BUSD_TOKEN.transferFrom(msg.sender, manager, valueToManager);
```

- function withdrawMoney(uint256 gold) || In the function if you have a gold earned in the platform you will be able to withdraw to BUSD by the Price of

    uint256 amount = gold * 2e15; 2e15 is Scientific Number which is 2000000000000000 in Ethereum format it's called 0.002 BUSD where you can do it by yourself by going to this website https://eth-converter.com/ and put the 2000000000000000 in the WEI in ETH format you will get the value. Don't be confused why I am mentioning the ETH because BSC-SMARTCHAIN is the fork of Ethereum. All the currency number are dealing in WEI format.

- function kingBounty() || This function can be call by everyone once their towers and everything is upgraded and they will get this value: 250000 GOLD. Guess what? Only the big investors can reach to this level quickly and they can claim.

Small investors this is something for you watch
only if you have a big heart to donate your small
funds to whales.

- function collectMoney() || This function can be
call by everyone. If you are holding gold you
will collect that gold.

- function collectStableBounty() || This function
can be call by everyone. You can collect your
bounty with it.

- function claimAirdrop(uint256 towerId) || This
function will get you airdrops by Tower entering
the Tower ID.

- function upgradeTower(uint256 towerId) || This
function will upgrade your selected tower.

- function upgradeTowerMax(uint256 towerId) || This
function will upgrade your by max-level

- function upgradeTowncenter() || This function
will upgrade your Town Center

- `function upgradeStable()` || This function will upgrade your stable max is 3.

- `function compound()` || This function is little tricky in the previous one version they were giving straightforward compounds but in this one it's giving them 2x compounds. Whoever compound it will be double of their amount. If a big whale investor he would able to withdraw 75% to 80% of the contract balance.

- Few functions which is viewer function which is safe it doesn't belong to the owner it's just help the frontend website to show the values.

- `function getUpgradePrice(uint256 towerId, uint256 chefId)` || in this function the first tower price is very low to attract people but the other tower has very high prices then their previous version.

- `function getYield(uint256 towerId, uint256 chefId)` || In this function very insane number of ROI on the investments. Invest carefully.

- `function getMarket(uint256 marketId)` || In this function the referral rewards are very high than their previous version.

- `function getMarket(uint256 marketId)` || Bounties are also very high once the whales entered the market the project can be easily drain and rug.

- `function getStable(uint256 stableId)` || Stables are also increased than the previous version.

As we have reviewed the smart contract. Investing in this project is your choice. They are telling to people we don't have fees but they have referrals and everything is really high in the project the contract can be drain easily and most of the investors can be rug.

SCORE

TEAM: 4/10: - (Team is not doxed and their previous 2 platform is drained within a month)

Smart Contract: 2/10: - (The smart contract has no exploits but the owner has the fixed the number of higher bounties, higher stables, and the referral reward system. So, it can be transparent to people)

Exploit 10/10: - (There is no exploit and backdoor in the smart contract)

Funds Generating: 0/10 (It's depended on all the investors funds)

RISK: 0/10 - (This contract can be drain easily)

FEES: 6/10 (This is no owner fees but they have by default the referral rewards)

Total Score: 22/60
